

## New arrivals to Spec's by Collin Williams

We receive new items to Spec's every day. The problem is that with so many items arriving it is virtually impossible to highlight those products to you. The sheer number would be overwhelming!

However, since we do use our newsletter media source to help guide you in your quest for the ever-new, ever-impressive alcoholic find I have decided to showcase some of my favorite new arrivals to Spec's that have caught my eye. Enjoy and ask for them at your neighborhood Spec's!

### **TY-KU Sake Bomb Kit** **\$26.59**

This brand of sake is catching on strong due to its excellent advertisements and media sourcing. However, the sake itself is also very good and will bring you into a new sensory perception of sake enjoyment. As a super premium Junmai Ginjo style, the price and volume ratio should leave you feeling very comfortable with your purchase.

### **Juve y Camps Reserva Familia Brut Nature 2005** **\$14.99**

I enjoy cava – a lot! Its incredible flavors match with an incredible price fit the mold of what I look for in my wine purchasing. This style of Cava is truly unique. Made in the Brut Nature method – meaning no residual sugar is left in the bottle, this wine can highlight the lovely yeasty notes followed by wonderful fruit. Interesting to note: this style is seen all over Spain and is usually the glass you get when ordered at a bar there, but is rarely seen in the US.

CORLEY FAMILY NAPA VALLEY

**MONTICELLO VINEYARDS**

### **Monticello Winery Presidential Merlot and Chardonnay** **Merlot - \$14.19      Chardonnay - \$14.19**

The Monticello Winery has long been a favorite of mine since I entered this business. However, I have grown even more fond of this family after a recent visit to the winery in Napa where I spent hours in the cellar with Chris Corley – winemaker. These two new wines to Spec's, Presidential Merlot and Chardonnay, are some that gave me excitement. The Monticello wines have always been good but just out of reach for my everyday purchase. Now, however, I can enjoy their juice (all sourced from Napa estate grown fruit with a mixture of different clonal selections) at an absolutely fantastic value. 🍷
